Luis Serrano

Senior IT Consultant | Front-end | React/Redux | Mentor
Barcelona

Extracto

I am a Software Developer, and I have been coding for more than 20 years. I have used many technologies, but my strongest skill is Javascript development. I specially like React/Redux. I am normally in charge of making things look pretty (front-end, UI/UX). My approach is simple: I don't seek to reinvent the wheel, nor impress you with over-engineering.

I learn fast and I love new frameworks/libraries, but I am not a follower of trends for the sake of hypes. I don't require much, but I expect fair play and transparency.

I love new challenges and I believe I have done some interesting projects over the years, some of them I am really proud of. I am always keen to learn new things from the best out there.

Finally, I love mentoring junior developers, teaching them soft/hard skills to help them in their careers.

That's me.

Experiencia

Capgemini
Lead Software Engineer
abril de 2021 - Present (2 meses)
Valencia, Valencian Community, Spain

After around 2 years of working for Capgemini as a freelancer, I have joined their Agile Delivery Center in Valencia (Spain) as an employee.

As a Senior developer, my role is to help leading international projects & teams towards success.

A Quuppa partner company

1 año 1 mes

Engineering Manager

octubre de 2020 - marzo de 2021 (6 meses)

Valencian Community, Spain

As an Engineering Manager, I helped transforming desktop, .net based apps to web apps (React/Redux). I created the seeds of the new web based projects and guided developers through the implementation, the general coding guidelines, while also doing some coding myself. I also documented all business requirements, and populated a full backlog out of them. The projects used Quuppa technology and RTLS, so I had the opportunity to learn about real time indoor location.

Senior Frontend Developer

marzo de 2020 - octubre de 2020 (8 meses)

Valencia Area, Spain

I helped developing new features for two products, focusing on the front-end.

- Swish App (Basketball): <https://www.nbn23.com/en/swish/> (React Native/ Redux)
- A MVP product (social distance, indoor location, RTLS, based on Quuppa technology and React)

luisnomad.com

Technology Consultant

enero de 2017 - marzo de 2020 (3 años 3 meses)

London - Valencia - Barcelona

Product Management, Web Development, quick product prototyping, e-commerce sites, and other software projects. From time to time, I also do tech recruitment! Send me your candidates and I'll help you validate their skills.

Development Customers:

- (80%) Capgemini/K2 Partnering Solutions (Sitecore/SXA/React)
- Rooster Money (React/Node)
- LambdaLoopers (WordPress/SASS/JS)
- BCN Marketing (WordPress/JS/CSS)

Consulting Customers:

- Flexible IT (Product Owner)
- Scale Capacity - Los Angeles, US (Project Manager Associate)

Main technologies:

- Javascript (and frameworks around it, specially React)
- WordPress themes & customization
- NodeJS, Meteor, IBM node-red for IoT projects

Technical recruitment:

- How many times an awesome candidate is lost because the wrong person was in charge of the screening process? You can't put a busy developer to do HR tasks, and if you do, you must pick someone who's got people skills, good communication, empathy and emotional intelligence. I have 20 years in the field, and I am old enough to detect bullshit when I see it. But I also believe in people and I am willing to put the time and effort and give your candidates a fair chance.

Other stuff I do mostly for fun, but it does influence my work in the web & marketing industry:

- Content creation
- Video production

Flexxible IT®

Freelance Product Owner at Flexxible IT® - Apps2Digital (Contractor)
julio de 2019 - diciembre de 2019 (6 meses)

Barcelona Area, Spain

Apps2Digital Product Owner (external, freelancer)

ARKD BOX

Systems Analyst

marzo de 2005 - noviembre de 2005 (9 meses)

London, United Kingdom

Systems Analyst & Web Developer

Varios

Desarrollo web & Analista programador

enero de 2000 - marzo de 2005 (5 años 3 meses)

Spain

Durante este periodo trabajé en varias empresas, entre Valencia y Barcelona. Mis funciones fueron muy distintas, abarcando un abanico muy amplio que me proporcionó una visión global de la industria, y experiencia suficiente para iniciar mi especialización. Entre las tecnologías que usé y llegué a dominar, destaco: VB6, ASP y PHP en mis inicios. Primero como parte de equipos pero

con tendencia a desarrollar de forma independiente soluciones completas. Con la llegada de .Net, me especialicé en esta plataforma de desarrollo, compaginándola con PHP en proyectos freelance. Además, he realizado trabajos de fotografía y diseño gráfico (retoque de imágenes, modelado 3D, flyers, catálogos y revistas). Solicitar CV para información más detallada.
